

The **TREKKASAW** is the only truly portable band saw using 4" wide blades, capable of sawing logs up to 7.5m long and 1.4m in diameter. The TREKKASAW is in use throughout the world from the rainforests of South America to the Steppes of Russia.

The **TREKKASAW** features innovative rotary stainless steel pressure guides to deflect the blade downwards. This provides a true path for the blade between the guides and allows the sawmill to have smaller diameter pulleys. The 16mm deflection stiffens the tooth edge so retaining the blade tension for considerably longer. This translates to a higher quality of sawn timber combined with constant cutting accuracy with each blade. Loglogic's guide system provides a noticeable performance gain over other mobile sawmills and is largely maintenance free.

FEATURES

- Cutting accurately and efficiently up to 1000mm wide.
- Set up in less than 10 minutes.
- Heavy duty adjustable log decks.
- 12 volt electrical system.
- All pivots and bearings fitted with grease nipples.
- Hydrostatic drive to head to ensure minimum travel weight during cutting.
- Rapid stopping of blade due to dynamic braking on shut down.
- Cast aluminium pulley wheels with stainless rim crowning.
- Twin gantry and tensioned rails.
- Screw thread height adjustment for consistent cutting accuracy.
- Minimum tool requirement for field maintenance.
